SUMMARY

Technical Business Analyst with 15+ years of experience spanning Front-Office Trade Support, Asset Management, and Investment Reporting at global institutions (HSBC, Citigroup, LGIM). Extensive experience working with derivatives, fixed income and equity products, investment reporting, stakeholder engagement, requirements gathering and business-critical data solutions. Combines strong financial markets knowledge with modern technical skills including Python, SQL, data analysis, reporting automation and business systems support.

CORE COMPETENCIES

Data Analytics & BI: Python (Pandas/NumPy), SQL, PostgreSQL, Data Validation, Financial Reporting.

Software & API Engineering: Django, JavaScript, Stripe/Rest APIs.

Methodologies & DevTools: Agile/Scrum, Jira, Git/GitHub, Pytest.

Business Analysis & Governance: Requirements Gathering, Trade Lifecycle, Stakeholder Management, Quality Assurance & Testing.

PROFESSIONAL EXPERIENCE

Financial Systems & Business Analyst Contractor | 2008 – Present

Institutions: Legal & General Investment Management (LGIM), Columbia Threadneedle, HSBC, Lehman Brothers, Citigroup.

- Acted as a core business analyst liaison between front-office stakeholders, portfolio managers, and technical architecture teams to translate complex financial business logic into scalable data solutions.
- Applied deep front-to-back trade lifecycle knowledge across derivatives, fixed income, and equity products to map workflows and optimise business-critical trade processes.
- Produced and verified critical data assets, ensuring absolute data quality, upstream/downstream data lineage, and strict regulatory compliance.
- Partnered with private clients (2020–2023) as a Technical Consultant to scope project requirements, map execution timelines, and engineer responsive data architectures.

Trade Support & Front-Office Market Operations Contractor | 2004–2008

- Applied deep front-to-back trade lifecycle knowledge across derivatives, fixed income, and equity products for global banks including HSBC and Citigroup.
- Acted as primary liaison for front-office stakeholders (traders, PMs, research teams), mapped complex workflows, gathered requirements, and delivered data analysis to optimise business-critical trade processes.

TECHNICAL VOLUNTEER PROJECTS

Technical Business Analyst / Systems Analyst – SEDS Connective | Dec 2025 – Mar 2026

- Led the end-to-end optimisation of the digital platform, translating operational needs into high-fidelity wireframe blueprints and functional specifications.

Systems & Data Presentation Analyst – thisisthegeneration.com | Oct – Nov 2025

- Conducted business process analysis to overhaul reporting system architecture, ensuring strict cross-browser technical compatibility.

KEY TECHNICAL & DATA PROJECTS

PyVisuals | Investment Analytics & Reporting Pipeline (Rapid Deployment) | Apr 2026

<https://sharon-henry.com/dataviz.html>

Tech Stack: Python, Matplotlib, Seaborn, Pandas, Bootstrap 5, Git, and VS Code.

- Engineered automated Python-based data pipelines to ingest, clean, and process high-volume financial datasets, eliminating manual spreadsheet bottlenecks and reducing operational risk.
- Designed dynamic visual reporting modules to transform complex portfolio analytics into stakeholder-ready data visualisations.

Auraic | Transaction & Payment Integration Engine (End-to-End Deployment) | Mar 2026

Tech Stack: Python, Django, Stripe API, PostgreSQL, Bootstrap 5, jQuery, Git, Heroku, and VS Code.

GitHub - <https://github.com/sphenry2799/Auraic> Live Demo - <https://auraic-2d04012354a2.herokuapp.com/>

- Developed a full-stack transactional application managing relational databases (PostgreSQL) and structured data exchange workflows.
- Implemented secure data ingestion layers and authentication systems with a strict focus on data validation, safeguarding transaction data transmission, client data privacy, and strict regulatory compliance.

Planora | Resource Allocation & Scheduling System (Agile Deployed) | Dec 2025

Tech Stack: Python, Django, Bootstrap 5, Heroku, Git, and VS Code.

GitHub: https://github.com/sphenry2799/Planora_Bookings

Live Demo: <https://planora-reservations-32b582e35d5e.herokuapp.com/accounts/login/>

- Designed Django relational database models to enforce absolute data consistency and prevent processing latency under Agile development frameworks.
- Improved reporting accuracy and minimized delivery latency by implementing rigorous data validation logic and automated reporting batch-scheduling workflows.

EDUCATION & CERTIFICATES

Level 5 Diploma in Web Application Development | Remote/Part-time | Completed Mar 2026

Code Institute (City of Bristol College) Diploma focused on **data-centric full-stack frameworks**.

Overall Grade: **Merit**.

Google AI Essentials Course - Dec 2025

Microsoft Excel Associate (Microsoft 365) - Result: 940/1000, 2024

Level 2 Certificate in Data Analysis - Result: Pass, 2024

Level 2 Certificate in Digital Marketing - Result: Pass, 2023
